

## FileZilla shortcut keys

In case you wonder FileZilla is one of the most popular FTP clients out there. It has a nice list of shortcut keys that you can use to master it.

**F2** ? Rename selected file

**F3** ? Search remote files

**F5** ? Refreshes local and remote file and folder views

**Tab** ? Switches to the next view

**Alt+Down** ? Transfers the currently selected item to an item of the same name in the other pane

**Alt+Up** ? Navigates up one line in a tree view (same as Up Arrow), navigates to parent folder in file view

**Ctrl+C** ? Stops the current operation

**Ctrl+D** ? Disconnects from server

**Ctrl+E** ? Show files currently being edited

**Ctrl+M** ? Manual transfer

**Ctrl+O** ? Enable directory comparison

**Ctrl+P** ? Process queue

**Ctrl+Q** ? Exit

**Ctrl+R** ? Reconnects to server

**Ctrl+S** ? Opens the Site Manager

**Ctrl+T** ? Opens a new tab

**Ctrl+U** ? Preserve timestamps of transferred files

**Ctrl+Y** ? Toggle synchronized browsing

**Enter** ? Transfers the currently selected item if it is a file or expands it if it is a directory

**Ctrl+Page Up/Page Down** ? switches to next/previous tab  
**Up Arrow** ? Moves up one item in the current view

**Dn Arrow** ? Moves down one item in the current view

**Left Arrow** ? Nothing in a files view, Up one level in a tree view

**Right Arrow** ? Down one level in a tree view, if there are subfolders, nothing if there are none. Pressing once expands a collapsed node. Pressing again steps down into it.
