

Shortcut of the day: Ctrl + E

Howdy,

Shortcut of today is

Ctrl + E

It has several uses quite varied so it's worth a look:

1. Change a paragraph between center and left-aligned, in word processing software (e.g: MS Word).
2. Focus and select Web search bar in your browser to start searching.
3. Move to end of line in Command line environment.

Let us know should you find other actions for this shortcut. Thanks!
