

Shortcut of the day: Ctrl + I - Italic

Hello,

Shortcut of today is

Ctrl + I

What it does ? basically:

1. Makes selected text **Italic** ? in most word processing software (Such as Google Docs) as well as most text editing capable programs and applications both offline AND online.
2. Opens up Bookmarks panel in your browser (for Firefox & IE)
3. Enter RAID Configuration Utility for some Intel Desktop Boards.

DO comment to tell us of other actions for this shortcut. Thanks!
