

Shortcut of the day: Ctrl + U - Underline

Hello,

Shortcut of today is

Ctrl + U

Here is what to expect when you use it:

1. Makes selected text **Underline** ? in most word processing software (e.g.: MS Word) and some text editing capable programs and applications both offline AND online.
2. Opens up View Source window in your browser (Firefox & Chrome)
3. Open up the Hue/Saturation box in Adobe Photoshop. Useful for example to turn a color photo into a black and white image.

DO comment if you know other. Thanks!
